Summary

I am a Btech-IT student at SRMIST. Due to graduate in the coming years, I am eager to secure challenging roles in the IT industry.

I'm an independent web developer who is passionate about bringing the client's visions to life.

My strongest skill is my creativity. Being able to gather client's requirements and translate those into an engaging, effective, and unique website is what has helped me make beautiful websites. Alongside this, I have developed sound communication skills while delivering presentations to large audiences at university. As such, I am confident that I can make an instant impact in engineering roles.

I am eager to hear about potential career opportunities, so I would be pleased to chat about job openings in the engineering sphere.

If you want to talk about programming, coding, software engineering, or anything else, drop me a line.

Skills: C++, Javascript, Front-End Web development, Html, Css, GIT, Node.js, React.js
